**Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences**

The Suraj Singh Memorial College is committed to ensure the holistic development of the students through a student-centric learning process and suitable curriculum design implementation. The departments adopt the following strategies in varying degrees to make learning more students-centric and ensure the holistic development of the students:

## **Summer internship**

An internship is the best way to translate the classroom knowledge into practice. By doing an internship, the students will gain experience, learn new skills, add value and earn real experience for their career prospects

An internship allows a student to:

- Expand the knowledge and understanding of the fields;
- Contact the network professionals and administrators in the fields; and
- Gain hands on training and professional experience.

## **Institutional training**

The students of departments of B.C.A. (BCA) have to undertake the Institutional training programme. Duration of the institutional training is 56 Days in the middle of their II and IV Semesters. The main objective of this training programme is to give optimum exposure to the practical side of Information Technology and Industry.

## **Industry visits**

Industry visit is a part of the Education, during which students visit companies and get insight into the internal working environment of the company. It also sensitizes students to the practical challenges that organization face in the business world. Moreover, it gives exposure to the practical working environment, which increases functional awareness of the various Industrial sectors; acquaint students with Interesting facts and breath-taking technologies. In addition to industrial exposure and knowledge, this will increase the internship and placement opportunities. Industrial realities are opened to the students through their industrial visits.

## **Case studies**

Case study is a powerful student-centered teaching strategy that can impart students with critical thinking, communication, and interpersonal skills. Besides lectures, case study methods are also employed to ensure the active involvement of the students in the teaching-learning process. Case method is also an effective tool in understanding real world with professional skills. Working on case studies requires good organizational and time management skills. It increases student proficiency with written and oral communication, as well as collaboration and team-work

## **Projects and Field practicum**

The best way to master a subject is by doing projects. Through a project the students not only get a deeper understanding of the subject but also gain hands-on practical experience. By doing a project, the students will

- Understand their subject better
- Get practical experience
- Have a chance to showcase their skills
- Learn team work, communication skills and responsibilities

## **Guest Lectures, Seminar & Workshops**

As part of academic development, associations of all the departments arrange guest lectures and seminars throughout the year on topics of core subjects, Career oriented lectures, recent technologies and research areas periodically. Through the association, the students are encouraged to attend seminars and present papers organized by other reputed institutions. In addition to that supporting centers of the Institution extend their activities in providing / arranging guest lectures, seminars and workshops.

## **Exhibitions**

The participative learning can be adopted at Institution-based practice through conducting student exhibitions refers to projects, presentations, or products through which students “exhibit” what they have learned. An exhibition is typically both a learning experience in itself and a means of evaluating academic progress and achievement.

## **Competitions**

Competitions play a role in motivating students to perform and excel and offer a lot more reward than just the winning prize. Students get a chance to gain substantial experience, showcase their skills, analyze and evaluate the outcomes and uncover personal aptitude. They also encourage students to adopt innovative techniques and develop their ideas and skills.
